REVENUE GROWTH (AUD MILLION)

Taskforce Australia | Three commercial observations from ProfitPulse

01

Three streams, one margin question

Taskforce runs three distinct service lines: RentSafe compliance checks, RentRepair maintenance, and consumer brand maintenance partnerships. At \$12.8 million with 19 staff the business runs lean. But sustained growth across three streams raises a critical question: which stream delivers margin after platform costs, tradesperson coordination and compliance overhead are fully allocated? A product profitability engagement maps that in three weeks, ranking every revenue line by gross margin, contribution margin and operational drag, and giving the founders clarity on where the next hire, the next investment, and the next pitch should go.

02

Platform scale without a financial map creates risk

Three consecutive Smart50 appearances, each at a higher rank than the last, and a Telstra Outstanding Growth award in Victoria for 2024 confirm Taskforce as one of the fastest moving property tech businesses in Australia. But rapid platform expansion typically outpaces the financial architecture. With 300 plus real estate offices, 20 consumer brands and more than 5,000 tradespeople on the network, the margin profile of each segment is almost certainly uneven. Scaling the least profitable activity hardest is a common outcome when the margin picture is not clear. ProfitPulse maps this in one focused three week engagement.

03

Where does the next dollar go at \$12.8 million?

Revenue grew from \$7.43 million in FY2023 to \$12.8 million in FY2025, a 72 percent cumulative increase over two years verified across three independent Smart50 award citations. The momentum is real. The strategic question is capital allocation: which product line deserves the next hire, the next marketing dollar, the next technology investment? A Product and Service Line Profitability engagement produces a ranked view of every revenue line by gross margin, contribution margin and drag, giving the founders a defensible basis for every growth decision in the next 12 months.

These are observations offered in good faith. Taskforce has built something genuinely impressive. The question is simply whether the financial architecture is now keeping pace with the ambition.

Product and Service Line Profitability

\$3,950 one off

A three week project ranking every product or service line by gross margin, contribution margin and operational drag. Gives Taskforce Australia clarity on where to scale, where to fix and where to stop.
