Taskforce Australia. Three commercial observations from ProfitPulse.

01

Revenue is compounding faster than the team

Revenue moved from \$7.43 million to \$9.7 million to \$12.8 million across three consecutive Smart50 citations, a 31 percent lift in the most recent year, while headcount held at 19 across the same period. Revenue compounding well ahead of headcount is a strong platform signal, but it leaves less internal capacity to build the cash forecasting discipline the next phase needs.

02

A three year target raises the cash stakes

Taskforce has set a target of 50 to 60 percent compound annual growth for the next three years, funded through self funded organic growth rather than a further capital raise. Funding that pace from operating cash, on top of the new BigginScott Group volume from 1 July 2025, narrows the margin for error on receivables timing and contractor payment runs as the base scales.

03

Scale across 300 offices concentrates risk in the middle

RentSafe has delivered more than 140,000 jobs across 300 real estate offices and 180 major brands since 2021, and the new BigginScott Group relationship adds to that book from July 2025. Growth this diversified is a genuine strength, but running it well depends on knowing, week to week, which invoicing cycles and contractor payment runs are keeping pace with volume.

These observations are offered in good faith. Taskforce has built something genuinely well regarded in its category. The question is simply whether the weekly cash rhythm keeps pace with the growth target the business has set for itself.
