Paire: three commercial observations from ProfitPulse**01****Four markets in three years**

Paire has taken direct to consumer retail from a single Melbourne flagship at QV to stores in Singapore and Malaysia, then a United States launch in August 2026. Four markets in six years is rapid capital deployment across inventory, fit out and marketing. The Strategic Growth Diagnostic maps that expansion into one costed twelve month plan before the next market is chosen.

02**Revenue times ten, team times eight**

Revenue grew from \$1 million in 2021 to \$10 million in 2024, and the team has grown to 40 people, yet public coverage names only the two co founders across creative, textile and growth roles. A monthly Fractional CFO Partnership puts a senior financial voice at the table as the business scales into new markets and inventory commitments grow heavier.

03**Where the next dollar of capital goes**

Three new markets, a permanent flagship, and a product range grown from three sock styles to more than 60 lines all draw on the same capital base. A Capital Allocation Review would test how marketing, inventory and fit out spend across Melbourne, Singapore, Malaysia and the United States are earning their return before the next market decision is made.

These observations are offered in good faith. Paire has built something genuinely impressive. The question is simply whether the financial architecture matches the ambition.
