Catalytic IT: three commercial observations from ProfitPulse**01****Growth funded without outside capital**

Revenue moved from 2.5 million to 4.46 million to 7.4 million dollars across three Smart50 cycles, roughly tripling, with no raise, facility or equity round found anywhere in the public record. Before a new sales team and a second country are added, it is worth knowing exactly how much balance sheet headroom remains.

02**Flat headcount, tripling revenue**

Two separate Smart50 profiles, 2023 and 2025, both cite 23 employees while revenue climbed from 4.46 million to 7.4 million dollars, a real productivity story. A sales led expansion is a different kind of hire, and the rhythm that suited 23 technical people may not suit a new sales function.

03**A growth plan that is not yet costed**

The Smart50 2025 profile states a plan to build a new sales team over the next 12 months, plus a Devonport office already open and a planned Kuala Lumpur entry. None of that is costed publicly, and each piece competes for the same cash. A Strategic Growth Diagnostic turns intent into a funded plan.

These observations are offered in good faith. Catalytic IT has built something genuinely strong. The question is simply whether the financial architecture keeps pace with the ambition.
