Three commercial observations from ProfitPulse

01

Growth has outpaced margin visibility

Revenue grew 78 percent in a year, \$7.3 million to \$13 million, while the team roughly doubled, 15 to 30 people. (Smart50 2024, 2025 profiles). When headcount grows faster than revenue, margin usually moves before it shows on a P&L. A Product and Service Line Profitability review gives a ranked answer inside three weeks.

02

Three service lines, one blended number

Equality Media started in 2018 as a media buying practice and has since formally added strategy and creative, with about half of clients now buying more than one line. (Smart50 2025). Media, creative, and strategy carry different margins and staffing needs, so growth decisions are currently being made on revenue alone.

03

One sector carries the whole growth story

The agency is built specifically around the property sector, the foundation of its Smart50 and AFR BOSS results. (Company website, Mediaweek). That focus is a real strength, but it also means one property cycle carries more weight than it would for a diversified agency. A Strategic Growth Diagnostic can quantify how much of next year's plan should lean on adjacent sectors.

These are observations offered in good faith. Equality Media has built something impressive in seven years. The question is simply whether the financial architecture matches the pace of the last twelve months.
