KEY COMMERCIAL SIGNALS

Ranked 29th, Smart50 2025, revenue \$6.6M, 42% three year growth (SmartCompany, Nov 2025)

Named #1 Australian MSP, #69 globally, 2026 Channel Futures MSP 501 (Channel Futures, 2026)

36 staff on a utilisation based delivery model (Smart50 2025 award citation)

Built without external investors, has avoided pursuing mergers (Smart50 2025 coverage)

Founded 2019, Mount Waverley VIC, about 17km from Melbourne CBD (company site, directories)

01

Growth is outrunning utilisation visibility

Affinity MSP has grown headcount to 36 while lifting revenue 42 percent over three years, and has just been named the top ranked Australian provider on the 2026 MSP 501 index. In a utilisation based model, that pace of hiring makes it easy for billable mix to drift lower before anyone notices.

02

A bootstrapped model concentrates financial risk

The business has grown without external investors and has reportedly chosen not to pursue mergers, protecting its independence. That discipline is admirable, but every capital and pricing decision runs through a founder led team with no dedicated finance function testing the numbers independently.

03

External recognition should now trigger internal rigour

Two award programs in twelve months, Smart50 nationally and MSP 501 globally, have validated growth and operational depth to outsiders. The next test is whether revenue per technician, capacity headroom, and margin by client are tracked with the same rigour the judges applied.

These are observations offered in good faith. The business has built something impressive. The question is simply whether the financial architecture matches the ambition.

Workforce Capacity and Utilisation Review

\$3,950 one off

A four week review of billable mix, revenue per technician, and capacity headroom, so the next hire lands exactly where growth needs it.
